Upcoming Learning Courses at the EANM Educational Facility in Vienna

As we have a few places still available in the following Learning Courses held at the EANM Educational Facility in Vienna in the near future, we cordially invite you to register for them:

- [EANM Radionuclide Therapy - Dosimetry Course – May 3-4, 2008](#)
- [EANM Learning Course Technologists on PET/CT – May 31 - June 1, 2008](#)
- [EANM Learning Course on PET and PET/CT in Oncology – July 5-6, 2008](#)

We encourage you not to miss this opportunity for an extraordinary and top-quality educational experience – featuring up-to-date lectures, plenty of room for interaction and a comfortable set-up at the EANM Educational Facility.

You will find detailed course information at the respective web-pages.

The course organisers and the EANM Educational Facility are looking forward to welcome you!

Certification in Nuclear Cardiology

As you might be aware, the EANM-ESC cooperation takes place in the framework of the European Council of Nuclear Cardiology (ECNC). In this context, **ECNC** invites all qualified physicians to take

1) the fifth **CBNC (Certification Board of Nuclear Cardiology) certification examination for Nuclear Cardiology** to be held in Europe:

Examination Date: December 1-6, 2008
Regular Registration Deadline (reduced fee): May 23, 2008
Final Registration Deadline: September 29, 2008

ECNC strongly recommends that all European physicians, who are active in Nuclear Cardiology and eligible take this exam. The exam is a benchmark of quality in Nuclear Cardiology in Europe.

2) the **Certification Examination in Cardiovascular Computed Tomography (CBCCT)**. The examination was developed to define and evaluate the technical and clinical expertise required for optimal study performance and interpretation by all physician providers. It will be a computer based examination administered throughout the U.S and will be open to candidates all over the world.

Examination Date: 22 September 2008
Regular Deadline (reduced fee): 23 May 2008
Late Deadline: 25 July 2008

Please note that that the regular registration (with reduced fee) for the exams will end 2 and 4 months respectively before actual exam date. **Seats at the Prometric Test Centres are limited.**

Reporting Schemes on EANM Radiopharmacy Committee Website

On behalf of the EANM Radiopharmacy Committee, we cordially invite you to visit the committee's website, where a new version for Adverse reaction (ADR) reporting has now been implemented into the Virtual Radiopharmacy Platform VIRRAD:

www.eanm.org/committees/radiopharmacy/rapha_report_schemes.php?navId=136

A means of reporting Defective Products has also been incorporated. The system for recording Adverse reactions to Radiopharmaceuticals (the ADR database) now matches the one previously operated by the EANM in collaboration with the UK Radiopharmacy Group.

EANM'08 Munich: abstract submission facts and figures

We are pleased to announce that the abstract submission for EANM'08 in Munich has been closed with following results:

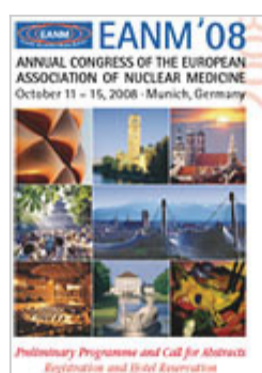

EANM'08

- Total abstracts submitted: 1.596
- Scientific abstracts: 1.511
- Technologists' abstracts: 85

The review process has already started; and you will receive a notification about the decision on your abstract by May 20, 2008.

The deadline for early registration is May 30, 2008. The final Scientific Programme will be available online by the end of June.

We are looking forward to welcoming you at EANM'08 in Munich which promises a scientifically high profile programme; and we cordially invite you to visit the EANM'08 Congress Homepage, where you can also find congress details and proceed to the congress registration.

Reminder: EANM Event Calendar

Over the past years, the EANM Event Calendar has become the online site where to find a comprehensive overview of the events in the field of Nuclear Medicine. This calendar is regularly updated and also lists conferences, symposia, congresses and educational sessions beyond the scope of the EANM. As you have probably noticed, event announcements in the EANM Newsletter are limited to events organised by the EANM. Therefore, we would like to remind you of visiting the EANM Event Calendar in order to find a comprehensive list of events in the field Nuclear Medicine.

An additional EANM website feature also provides organisers of a nuclear medicine related event with the opportunity to add this event to the EANM Event Calendar via a simple online input-mask. In order to prevent misuse, the submitted announcements will be forwarded to the EANM Executive Secretariat and are released if they are ok.

The second website feature of the EANM Event Calendar offers the opportunity to request "EANM Auspices" for events. This feature aims at fostering quality events in the field of nuclear medicine. The EANM Auspices form is ready for download together with information explaining in detail the background of this new initiative.
